

MOHAMMAD JOUHARI

SENIOR FULL-STACK SOFTWARE ENGINEER | ANGULAR - .NET

📍 Amman, Jordan 📞 0790475885 ✉️ mohammad.jouhari@gmail.com
🌐 linkedin.com/in/mohammad-jouhari-42461330 💻 github.com/mohammadjouhari 🌐 my-cv-cnoj.vercel.app

PROFESSIONAL SUMMARY

Accomplished Senior Full-Stack Software Engineer with comprehensive expertise in building robust, scalable enterprise web applications using the **.NET ecosystem** and modern frontend frameworks. Proficient across the entire Software Development Life Cycle (SDLC), utilizing Clean/Onion Architectures, CQRS, and advanced database integration. Experienced in microservices architectures with messaging tools like RabbitMQ, as well as modern QA practices involving manual and automated frameworks. Highly analytical professional with exceptional communication skills and a track record of implementing high-performance solutions.

TECHNICAL SKILLS

Backend Dev:	C#, .NET Core 7/6 (Web API, MVC), ASP.NET Web Forms, ABP Framework, OOP, LINQ
Data & ORM:	Entity Framework Core (Generic Repository Pattern, Fluent API), SQL Server, Stored Procedures, T-SQL
Frontend Dev:	Angular (Routing, Lifecycle, SSR), TypeScript, jQuery, JavaScript, HTML5, CSS3, Razor Pages
Architecture & Integration:	Onion Architecture, CQRS, MediatR, Fluent Validation, Dynamics 365 ERP Integration, Webhooks, RabbitMQ
DevOps & Tools:	CI/CD Pipelines, GitHub Actions, Postman (API Testing), Serilog, AutoMapper, Docker
Testing & QA:	Selenium WebDriver with C#, Unit Testing, QA Manual Testing (Black/White/Gray Box), ISTQB Foundation
Methodologies:	Agile, Scrum Master Methodology, SDLC Management

PROFESSIONAL EXPERIENCE

Salma AI — .NET Core Developer May 2026 — Present	Amman, Jordan
- Architect and engineer a highly responsive administration dashboard using HTML5, CSS3, and .NET Core Razor Pages for backend business logic. - Implement optimized server-side processing workflows to streamline data visualization metrics and management.	
MariaSoft L.L.C. (Honeywell Zebra Soti) — .NET Developer November 2025 — March 2026	Amman, Jordan
- Engineered enterprise software applications leveraging the comprehensive ABP Framework ecosystem. - Implemented Dynamic Client Proxies and structured Client-Side APIs to ensure seamless and efficient cross-layer system communications.	

Self Employed — Consultant Web Developer

Remote / UAE

January 2021 — July 2024

- Designed and architected an advanced dynamic category filtering system featuring responsive multi-level sidebars and intuitive navbar navigation layout components.
- Developed robust shopping cart client persistence utilizing browser local storage integrated with AJAX global handlers to manage asynchronous state updates.
- Integrated RabbitMQ message brokers to distribute asynchronous automated email notifications and handle backend e-commerce order queues.
- Built an enterprise HR solution utilizing ASP.NET Core Web API and Entity Framework Core, provisioning secure RESTful interfaces for managing profiles, payroll, and attendance.
- Configured granular Code-First structural models and custom DbContext behaviors with the Fluent API while leveraging Repository Patterns for comprehensive database abstractions over SQL Server.

Camel Race Association — Software Engineer

Abu Dhabi, UAE

January 2019 — January 2021

- Maintained legacy Web Forms corporate platforms and rebuilt the main company website using modern web engineering principles.
- Formulated and executed comprehensive manual QA procedures covering both native mobile application builds and core backend web systems.

Emirates Development Bank (EDB) — IT Analyst Programmer

Abu Dhabi, UAE

April 2018 — September 2018

- Maintained and optimized the core institutional Emirates Development Bank platform written in PHP.
- Supported and refactored the EMCR project infrastructure developed via legacy .NET Web Forms.
- Successfully completed a complex Temenos T24 Core Banking API integration with a high-performance modern Single Page Application (SPA) utilizing Angular.

Sharaf DG — Junior Software Engineer

Dubai, UAE

March 2015 — October 2017

- Maintained and enhanced corporate e-commerce digital properties using WordPress and specialized PHP extensions.
- Developed and launched "Sales Tool," an internal proprietary application built with the Laravel PHP framework to empower store personnel with real-time operations data.
- Enforced strict quality assurance procedures and test coverage across the primary consumer website, mobile store apps, and internal utility platforms.

Norq Solutions — Software Engineer

Dubai, UAE

May 2012 — March 2015

- Built core RESTful backend APIs and managed robust corporate portal pages utilizing ASP.NET MVC and Web API technologies.
- Designed high-performance SQL relational databases, creating complex views, stored procedures, and custom user-defined T-SQL routines.
- Conducted complete manual verification pipelines for both Android and iOS native mobile apps alongside backend administrative services.

EDUCATION

Bachelor of Science (BSc) in Computer and Information Technology

2008 — 2012

American University in Dubai | GPA: 3.5 / 4.0 (Specialization: Application Development)

High School Diploma

Al Mutanabi Governmental School | *Score: 96%*

2004 — 2008
